

bica[®] FROM WASTE — TO RESOURCES

Include waste sorting in your decor
Danish design and quality

Your partner in waste solutions

For more than 10 years we have been developing minimalist and flexible waste solutions suitable for offices, educational institutions, hospitals and shopping centers. Waste is a massive problem, but waste has potential as well. We want to contribute to changes and make it easier for companies and public institutions to separate their waste. Waste sorting should not be difficult.

We provide indoor and outdoor solutions of high quality that meet your needs within waste management. Our indoor solutions are EU Ecolabel-certified and comply the EU's strict environmental requirements. Furthermore, we offer customized and specially designed solutions to address your specific needs.

It is our finest job to make sure that all your needs and that statutory requirements are met before we propose a concrete solution to your company. The right solutions depend on the number of employees, the décor of the office, who are handling the waste and what is the budget. Then you will have a waste solution that will last for many years to come.

FROM WASTE

Experience how easy waste sorting
can be with the right solution,
that matches the needs.

TO RESOURCES

Danish design with focus on functionality and quality

Waste solutions should be a part of everyday life in the companies. The waste solutions should not be hidden but placed strategically to achieve efficient sorting. This requires more from the overall design.

Bica develops solutions in steel with a sleek line and minimalist design to fit them into the décor. The material and surface ensure high hygiene and minimal maintenance. It is possible to scale up waste solutions if the needs for separating changes over time.

We want to use our solutions to make waste sorting a natural part of the decor/layout of all businesses, public offices, regional institutions, and schools. And always with the goal of turning waste into resources.

All the benefits of Bica

Combine waste bins as needed

Connect together with powerful magnet
- scales up if the need arises

Great hygiene and minimal maintenance

Made of powder-coated steel

Integrated and solid bag holders

Square and strong
- the bag will stay in place

All the benefits of Bica

Front doors with soft close & lids with gas spring

Ergonomically correct emptying
- soft close and gas spring for silent closing

Hidden wheels and adjustable feet Easy to move when cleaning

Adjustable shelf system Increase number of fractions by using shelves and inner bins

EU Ecolabel certified indoor waste solutions

Optimize your business with an effective solution for indoor waste sorting. With Bica recycling bins, waste sorting becomes easier in the office, educational institution, school, airport and at the theatre. Our waste sorting solutions for indoor use are stylish, so they can easily fit into the interior and can be combined as needed.

Bica Model 829 Waste sorting 2x65 + 1x95 ltr.

Bica Model 873 Waste sorting 3x65 ltr.

Bica Model 950 Waste sorting 2x65 + 2x45 ltr.

Bica Model 973 Waste sorting 3x65 ltr.

EU Ecolabel certified indoor waste solutions

Bica waste sorting is a durable solution created for everyday use. Developed for the large office, the classroom, theater or shopping centre. Waste sorting must be easy to use. Bica inner bins allow further division of waste. Our waste solutions are available in black and anthracite as standard with smooth surfaces for easy cleaning.

Bica Model 880 Waste sorting 80 ltr. Up to 11 fractions

Bica Model 912 Waste sorting 3x15 ltr.

Bica Model 881 Waste sorting 80 ltr. Up to 11 fractions

Bica Model 911 Waste sorting 3x20 ltr.

Outdoor waste solutions

Makes it easy to sort waste in all outdoor areas. Both in parks, in urban spaces, shopping streets and in outdoor areas at the company. With a Bica outdoor recycling bin, the best conditions for sorting are created. The outdoor waste bins are designed in a strong construction with and without an ashtray.

Bica Model 712 Waste sorting 2x100 ltr.

Bica Model 5081 Waste sorting 100 ltr.

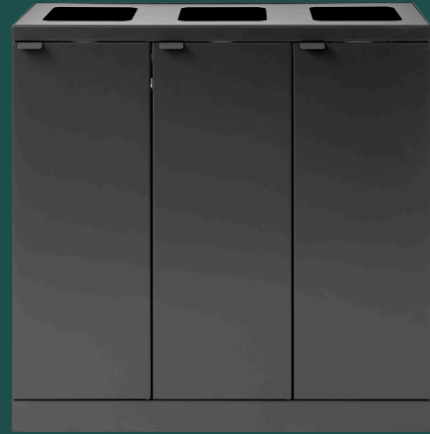

Bica Model 721 Waste sorting 2x50 ltr.

Bica's customer centricity drives the business

Standard Products

Bica offers a wide range of high-quality standard products, designed to meet your everyday needs. All products are made from powder-coated steel in either black or anthracite, and featuring functional details such as soft-close front doors, hidden wheels, and integrated bag holders. With our modern warehouse, we strive to have all our standard products in stock at all time, to ensure fast delivery service. Within our standard product offering, we offer complete solutions for waste sorting, including bags, pictograms, accessories, and spare parts.

Customization

Bica's customization service brings your unique vision to life, offering personalized solutions tailored to your specific needs and preferences. Our customization options gives you the flexibility to choose special colors, customize lids in shapes and form and define waste bin sizes, that differs from our standard product offering. All customized products are made-to-order and requires an Minimum Order Quantity (MOQ) of 24. pcs.

Full Product Development

Bica's full product development service takes your ideas from concept to completion. Our approach is designed to meet you unique needs and objectives through thorough analysis of the technical requirements for the end product. With our expertise within designing and manufacturing of waste bins, together with a transparant and collaborative approach that keeps you informed and involved at every stage. We ensure that the manufacturability and feasibility of the product concept is continously evaluated, so you design criterias are met.

Case: Agro Food Park

Agro Food Park approached us regarding a waste sorting solution that would meet the new statutory requirements for waste sorting into ten fractions. They also wanted a durable solution that would blend it naturally with the environment. Agro Food Park required a streamlined solution to replace their many standalone waste bins and to service the 100 businesses at the Park.

"Agro Food Park houses more than 100 different businesses. Consequently, we needed a streamlined solution that would blend in naturally across various environments."

"With Bica, we opted for a flexible good quality waste sorting solution that will last for many years. In case of new needs or requirements, we can add bins to our current solution. And also, our solution was designed to not require bin liners for dry waste."

Katrine Friis Østergaard, Secretariat Director, Agro Food Park

Case: The Royal Theatre

In addition to the waste sorting statutory requirement pertaining to all public institutions, waste sorting was also part of the green strategy of The Royal Theatre. Hence, a solution was required that would ensure efficient and uniform handling of waste bins while at the same time being esthetically appropriate for all these locations.

"It was important to us that, esthetically, the waste solution would match the architecture while at the same time making waste handling easier for cleaning staff."

"We wanted a waste solution that would fit right in with our decor without having to compromise on flexibility or functionality."

Kim Fridbjørg, Senior Architect, The Royal Theatre

Case: CPH - Copenhagen Airport

How do you get around 2.4 million monthly travelers of different nationalities to sort their waste? That is quite a challenge, but Copenhagen Airport is willing to take up that challenge. They tested various solutions to achieve effective waste sorting and ended up choosing a custom developed Bica waste solution.

"The waste solution had to be user-friendly for our passengers, fit in well with the airport and function in daily operations now and in the future. That is why we chose a Bica solution."

"Bica was accommodating to specially develop a waste solution for us, as their standard products did not match our needs."

Helle Holm Clausen, Senior Project Manager, CPH
